SALT RIVER PROJECT

OCM / Training Analyst — Requisition 1362

Dear Hiring Team,

I am applying for SRP's OCM/Training Analyst role supporting data literacy and AI adoption. My experience combines learning-program development, enterprise technology enablement, stakeholder communications and facilitation. I would bring a practical approach to helping nontechnical employees understand unfamiliar concepts and apply them in their work.

At American Express, I support the Jira Data Center and Rally-to-Jira Cloud migration, a program affecting approximately 60,000 people across seven personas. I coordinate and host 60+ enablement sessions across six global time zones, develop videos and presentations, and work with SMEs and leaders on communications and delivery. This experience is directly relevant to SRP's workshops, learning events and cross-functional engagement.

I use Copilot frequently and have supported its early adoption, alongside socialization of Rovo, ChatGPT and Claude. I also analyze Qualtrics surveys, session chats and transcripts to identify learning barriers; those insights helped inform a shift toward interactive demonstrations and Q&A. This combination of hands-on AI use, listening and iterative improvement would support SRP's learning and adoption priorities.

At Charles Schwab, I developed onboarding, upskilling and compliance learning, including self-directed journeys and SharePoint learning hubs. I would draw on that experience to support the program lead and SMEs in building SRP's data-literacy curriculum, reinforcing key concepts and keeping learning resources and communications useful. My toolkit includes Articulate Storyline and Rise, Camtasia, Adobe tools, PowerPoint and Microsoft 365.

My portfolio includes enterprise cloud-migration and feedback-analysis examples, AI enablement experience, and independent interactive learning samples. I would welcome a conversation about the program's learners, curriculum priorities and measures of success. Thank you for considering my application.

Sincerely,

Lorne Hopkins
